Trusted Python 3

Task-1

1. Install Jupyter notebook and run the first program and share the screenshot of the output.

```
In [1]: print('Welcome to ML for Deployment Course')
```

Welcome to ML for Deployment Course

In []:

2. Write a program which will find all such numbers which are divisible by 7 but are not a multiple of 5, between 2000 and 3200 (both included). The numbers obtained should be printed in a comma-separated sequence on a single line.

In []:

In []:

3. Write a Python program to accept the user's first and last name and then getting them printed in the the reverse order with a space between first name and last name.
